SUMMARY

Over 3 years of experience delivering full-stack web systems in cooperative banking, e-commerce, and government projects. Known for reliable delivery, clean code, and collaborative teamwork. I help teams ship faster while ensuring performance, scalability, and user satisfaction.

EXPERIENCE

Freelance Full Stack Developer

📅 08/2025 - Present  Remote

- Assisting clients in enhancing and maintaining existing web applications
- Implementing new features and optimizing system performance based on client requirements

Mid-Level Software Developer

National Confederation of Cooperatives (NATCCO)

📅 07/2023 - 03/2025  Remote

- Led frontend development of EkoopBanker Plus CASA V3, delivering a real-time user experience for cooperative transactions and mentoring a junior developer
- Contributed to backend APIs enabling secure transactions and accurate financial data across branches
- Developed Fixed Asset module for Accounting V2, supporting full asset lifecycle tracking and automated reports
- Integrated regulatory reporting tools, ensuring compliance and clear financial data visualization
- Maintained legacy production systems, resolving data issues to ensure stability and performance

Freelance Full Stack Developer

📅 01/2022 - 05/2022  Remote

- Built a responsive e-commerce dashboard with real-time inventory and product management
- Enhanced online store platforms by improving SEO and adding multilingual support for global reach
- Developed animated landing pages with modern UX, boosting user engagement and brand visibility

Software Developer

Cloud Panda PH

📅 10/2019 - 03/2020  BGC, Taguig, Metro Manila

- Collaborated on government platforms, including a booking and approval system for minors traveling abroad with streamlined workflows and document management
- Maintained certification systems, ensuring regulatory compliance and system stability by implementing structured approval workflows and resolving performance issues through collaborative debugging and optimization
- Conducted code reviews and upheld quality standards, reducing technical debt and enhancing maintainability

SKILLS

- HTML
- CSS
- Sass
- JavaScript/TypeScript
- PHP
- Python
- C#
- React.js
- jQuery
- Tailwind CSS
- Bootstrap
- Node.js
- Express.js
- Next.js
- Socket.IO
- CodeIgniter
- Laravel
- ASP.NET
- SQL Server
- MySQL
- PostgreSQL
- Restful API
- Git
- Github Actions
- CI/CD
- Kubernetes
- Docker
- Agile Development
- Crystal Reports
- Swagger
- Redux Toolkit
- Jest
- Data Structures and Algorithms
- Microservices
- MVC Architecture
- Event-Driven Architecture
- AWS
- AI Platforms (OpenAI, Anthropic)
- Agent Frameworks (LangChain, LangGraph, CrewAI)
- Model Context Protocol (MCP)

EDUCATION

Bachelor of Science in Information Technology
Palawan State University

📅 06/2013 - 04/2018

 Puerto Princesa City, Palawan

Junior Web Developer

International Payment Processing (IPP)

📅 05/2018 - 04/2019 📍 Puerto Princesa City, Palawan

- Built a Customer Service Record Management internal website, streamlining interaction tracking and improving support efficiency
- Enhanced an e-commerce platform for merchants, improving usability and scalability for product and inventory management

PROJECTS

National Confederation of Cooperatives (NATCCO)

- EkoopBanker Plus CASA V3 UI - Frontend Development (Paired)
- EkoopBanker Plus CASA V3 APIs- Backend Development (Team)
- EkoopBanker Plus Accounting V2 (Fixed Asset Module) - Full Stack Development (Solo)

Freelancing

- E-commerce Dashboard - Full Stack Development (Solo)
- Wilson Works Landing Page - Frontend Development (Solo)
- Libre Landing Page - Frontend Development (Solo)

Cloud Panda PH

- DWSD Minor Travelling Abroad - Full Stack Development (Team)
- Laguna Lake Development Authority - Full Stack Development (Team)

International Payment Processing (IPP)

- Customer Service Record Management System UI - Frontend Development (Paired)
- Customer Service Record Management System API - Backend Development (Solo)
- EMA V2 E-commerce Website - Full Stack Development (Team)

Personal (Solo)

- Uptime Monitoring SaaS - Full Stack Development
- Ticketing Microservices - Backend Development
- Autonomous Agents API - Backend Development
- Portfolio Site - Frontend Development
- Portfolio API with Chatbot - Backend Development
- Ratelimiter API - Backend Development
- Landing Pages (Educat, AgencyMatch, Trabook) - Frontend Development
- Resume Match - Full Stack Development
- AI Deep Research - Full Stack Development
- Gradio Portfolio Chatbot - Full Stack Development
- Rustify (JS/TS to Rust) - Full Stack Development

Visit portfolio.ksoftdev.site for live demos and source code of all listed personal projects.

ACHIEVEMENTS

- Led the successful frontend revamp of a legacy core banking system, mentored a junior developer, and shipped the project to production as part of a major system release
- Successfully implemented a Fixed Assets module into an existing accounting system, enabling full asset lifecycle tracking and automated depreciation reporting
- Built and deployed CI/CD pipeline for personal [projects](#) using GitHub Actions and Docker after completing DevOps and Microservices with node.js certification
- Built [AI](#) agents with LangChain, LangGraph, and CrewAI to power intelligent chatbots on personal portfolio, GitHub repos and resume-matching assistant. Developed a custom MCP Server to support real-time uptime monitoring for a personal SaaS project
- Agentic AI Engineering & LLM Engineering (2025) - Completed practical projects and contributed to [LLM Engineering](#) and [Agents](#) repositories as part of applied learning
- Earned HackerRank certifications in Problem Solving, JavaScript, Python, and SQL by successfully completing official skill assessments

CERTIFICATES

Agentic AI Engineering

Hands-on experience building autonomous AI agents, multi-agent systems, and orchestrated workflows with frameworks including LangGraph, CrewAI, and MCP Server.

LLM Engineering

Hands-on experience building and deploying LLM-powered applications with techniques including Retrieval-Augmented Generation (RAG), fine-tuning (LoRA), and multi-agent orchestration using both open-source and frontier models

DevOps Beginners to Advanced

Acquired hands-on experience with AWS, Docker, Kubernetes, CI/CD pipelines, and infrastructure-as-code through professional certification

Microservices with Node JS

Hands-on experience designing and deploying scalable microservices using Node.js, integrating Docker, Kubernetes, event-driven communication, and orchestration across distributed systems.

Data Structures + Algorithms

Hands-on experience mastering core data structures (like arrays, linked lists, stacks, queues), analyzing algorithm performance, and applying efficient solutions for common computational challenges
