SUMMARY

Experienced Software Developer Ready to Elevate Your Team I bring 3+ years of hands-on experience building applications that matter. Known for teamwork, reliable delivery, and collaborative problem-solving, I help development teams ship better products faster while maintaining code quality and user satisfaction.

EXPERIENCES

Mid-Level Software Developer - National Confederation of Cooperatives

July 2023 - March 2025, Quezon City, Metro Manila (WFH)

- Collaborated as pair programmer on EkoopBanker Plus CASA V3 frontend development using React.js, Next.js, TypeScript, and Redux Toolkit with real-time Socket.IO integration for core banking operations
- Contributed as team collaborator to backend API development using Node.js, Express.js, and SQL Server, handling banking transactions and financial data processing
- Independently developed the Fixed Asset module for EkoopBanker Plus Accounting V2 using ASP.NET and C#, enabling asset lifecycle tracking and automated financial reporting
- Implemented Crystal Reports integration for comprehensive regulatory compliance and detailed financial data visualization

Freelance Web Developer

January 2022 - May 2022

- Built comprehensive e-commerce dashboard using Laravel, PHP, and MariaDB for real-time inventory management and product tracking with Bootstrap and jQuery interface
- Developed responsive landing pages including Wilson Works (React.js with Tailwind CSS) and Libre (React.js with Sass) featuring smooth animations and modern UX design
- Created buyback e-commerce platform allowing customers to sell their devices with integrated pricing algorithms and listing management functionality
- Collaborated with designers and backend developers to transform Figma mockups into fully functional user interfaces with API integrations

Software Developer - Cloud Panda PH

October 2019 - March 2020, BGC, Taguig, Metro Manila (Onsite)

- Collaborated on DSWD Minors Travelling Abroad government booking system using PHP, CodeIgniter, and MariaDB with user-friendly approval workflows and document management
- Contributed to maintenance of the Laguna Lake Development Authority certification platform, ensuring system stability and compliance using PHP, MariaDB, and structured approval workflows
- Participated in team code reviews and maintained code quality standards, reducing technical debt and improving system maintainability across government projects
- Resolved critical performance issues through collaborative debugging and system optimization techniques

Jr. Web Developer - International Payment Processing

May 2018 - April 2019, Puerto Princesa City, Palawan (Onsite)

- Pair programmed Customer Service Record Management System frontend using HTML, CSS, jQuery, and JavaScript for efficient customer interaction tracking
- Independently developed backend API using PHP and MySQL to handle customer service records, support tickets, and data management
- Collaborated on EMA V2 e-commerce platform development for merchant product and inventory management using full-stack PHP and MySQL architecture
- Implemented Bitbucket version control workflows and provided comprehensive end-user support ensuring smooth application deployment and adoption

SKILLS

- **Frontend Development** - HTML, CSS, JavaScript, TypeScript, React.js, jQuery, Tailwind CSS, Bootstrap, Sass
- **Backend Development** - Node.js, PHP, C#, Express.js, Next.js, CodeIgniter, Laravel, ASP.NET, Socket.IO
- **Databases** - SQL (MariaDB, MySQL, MSSQL)
- **Tools & Practices** - RESTful API, Microservices, MVC, Agile, Version Control (Git), Crystal Reports, Redux

EDUCATION

Bachelor of Science in Information Technology - Palawan State University

2013 - 2018, Puerto Princesa City, Palawan
